

When you can't meet face to face...

## Consortium III Conference Server VOIP / SIP Integration and Smartphone Apps!

### You Now Have Total Control! Conferencing on the Go...Anytime, Anywhere!!

The new *Consortium III* Conference server is the next generation software based audio conferencing application from Forum Communications. The new application is based on the proven Consortium application, and adds additional features, a compact server platform, and a new, secure browser user interface, WebView.

- The Consortium III Smartphone Apps give YOU Control to Conference on the Go
- WebView Enhanced Browser Interface for simple Scheduling & Administration
- VOIP / SIP Integration or Hosted Cloud services make it easy to implement and Saves Money
- Comprehensive Features Adapt to Meet Your Specific Needs
- Record Conferences and Publish them as Podcasts

With our VOIP / SIP centric system, integration with your network or Unified Communications infrastructure is simple and cost effective. Implement a premised based server or take advantage of a Cloud based service application - either way start improving productivity and saving time, money, and travel costs!

Audio conferencing is one of the simplest, yet cost effective collaboration tools available. Save time, save money, and increase productivity. Give your organization the tools to communicate whenever and wherever they need...The Consortium III Conference Server.

Flexible Scheduling options allow you to set up conferences on the go, or automatically call and connect you and your staff. Our Smartphone Apps put that power into your hands whenever you need it and wherever you go.

# Consortium III System Features, Capabilities & Smartphone App

The system is simple to use and administer. Why waste time and money travelling when each group, department, or individual in your company can set up and manage their own conferences and preferences. Connect with coworkers and customers, in their office or on the go. The simple web based WebView user interface provides easy access to system features and setup, and requires no browser plug-ins.

- **Easy to use WebView Interface**
- **Set up or schedule conferences quickly and easily using WebView or Outlook**
- **Automatically send meeting notices via email with conference information**
- **Have the system call you automatically when it's time for the conference to start**
- **Simple & powerful System Administration & reporting provides security, control and cost savings**
- **Easily integrates with VOIP networks using Session Initiated Protocol (SIP) for easy and cost effective implementation.**
- **Expands easily from 20 to 1600 sessions.**

## Smartphone Features

The Consortium III Smartphone app gives you total control to Conference on the go..anytime, anywhere. Working in concert with our Consortium III Conference server, you can see your scheduled conferences and select the one you want to attend. With just a touch of a button, the system will call you back and add you to the conference. No more 800 numbers or conference codes to keep track of.

- **Quick Conference - Create and attend an "ad-hoc" conference on the go...Add additional participants from your Contact List.**
- **Attend a Conference - Attend a scheduled conference with just a touch...The system will call you back and add you to the conference.**
- **Moderate a Conference - See who is on the conference and who is speaking...You can lock the conference or dial out to add more participants.**
- **Dynamic Dial Out - While on a conference, select one or multiple participants from your contact list... the system will automatically dial out and add them to the conference.**
- **Activate a Pre-Set Blast Dial Conference - Automatically initiate a pre-Set Blast Dial Conference...the system automatically dials out to all scheduled participants and adds them to the conference.**

## Easy Scheduling with Outlook Integration

Set up onetime or recurring conferences on the fly. Use the Outlook meeting request and appointment windows to check participant availability, quickly schedule a conference with multiple participants, and send email confirmation to all parties with the date, time and details of the conference. Set up recurring weekly calls for staff meetings and let the system automatically "Blast Dial" all your expected participants and connect them instantly to the conference.

- **Use Outlook meeting request to schedule a new conference call**
- **Confirm Conference and Participant Availability and send email confirmations**
- **Recurring meetings or schedule changes automatically update the Conference Server**

**Forum-Your Partner For Success...**

## Features and Flexibility to Meet your Organization's Needs

The Consortium III gives you total control on how you want to implement and manage this powerful collaboration application. With unmatched flexibility and customization capabilities, the Consortium III delivers a powerful set of capabilities. Set up the system to match the needs of your organization. Require pin codes for conference security or leave them open for easy access. Record conferences and publish them as weekly podcasts. The system adapts easily to your requirements.

- Add Conference participants, create breakout groups, or dial out to add other participants
- Adjust scheduled start and end times or change your conference options
- The Priority Conference feature ensures your VIP conferences take priority over other scheduled conferences
- Record conferences and publish them as Podcasts
- Personalize your conference settings and preferences

## Control Your Own Application for Higher Security - Premise or Hosted

A dedicated premise or Cloud based conferencing application provides unparalleled security for the your company by leveraging all the existing facility security systems and the protection of your network firewall. The Consortium III offers customizable levels of access, authentication and administration for the perfect balance in security and convenience. The WebView browser can support HTTPS secure Client Certificate authentication, and our security features meet Military requirements. Whether deployed on premise or Private Cloud or Hosted service, your dedicated application is under your control.

- Choose from multiple levels of login or conference security features
- Require conference code or PIN for secure entry
- Lock the conference after all participants have joined
- Monitor the status of each participant in real time including who's speaking
- Pre-record and distribute Emergency or Mass (Blast) Notifications from on-site or remotely, including voice, text, email and Twitter

# Consortium III Server Platform and Design Specifications
